

AQSA SJUHADA
Faculty of Dental Medicine, Airlangga University

BIOGRAPHY

Dr Aqsa Sjuhada obtained both DMD and Master in Medical Physiology degree from Universitas Airlangga. He is very active in teaching innovations and eLearning development. As a certified lecturer with expertise in field of Medical Physiology, and Oral Biology, he concentrates both teaching and research work in field of neuroscience and endocrinology.

Recently Dr Aqsa Sjuhada is the head of System Information Department, and an instructional designer focused on developing engaging e-learning and blended learning. Although his works have always been related to education in some way, he has bounced around from teaching to training and now organizing Airlangga Dental Telemedicine.

Developing teaching innovation through telemedicine is his greatest interest. He has conducted Asia-Pacific dental teleconference events in APAN meetings, as well as some distanced learning with many overseas stations. He also promotes nationwide peer dental group for telemedicine to share knowledge and experience at a distance. His activities in expanding dental teleconference in Asia-Pacific is supported by TEMDEC.

Dr Aqsa Sjuhada also has been recognized as a pioneer to introduce Dental Telemedicine for rural dentists in remote areas in Indonesia. It helps local dentists to gain knowledge update via telemedicine facilities.

He reports his telemedicine activities in various scientific meetings and proceedings.

In Dr Sjuhada's philosophy, telemedicine should come to bring more value for Universitas Airlangga in the aspects of Education, Research & Publications, and Community Services.
