Ms. Yoshiko Houkabe has worked as an engineer for the Telemedicine Development Center of Asia at Kyushu University Hospital in Fukuoka, Japan since April in 2014. She is in charge of audio-visual operation in teleconference. She has experienced support of live demonstration at international conferences.

She has graduated from Kyushu University and holds a bachelor of Design and a master of Design Strategy. While in graduate school, she worked on a design research on a traditional pottery in Fukuoka and developed a series of tableware in collaboration with some traditional potters, a product designer and an editor.
